Acoustix wooden flooring collection

The solution for laying wooden flooring on a variety of sub floors which includes an intermediary layer of REGUPOL within the structure of the engineered floor board itself. Eliminating a whole process on site with a high grade engineered birch or okoumé laminated board with a thick European oak wear layer suitable for commercial use, and a branded REGUPOL acoustic layer. Manufactured in the UK, and available in 12 popular standard colours or, for a truly bespoke floor, in any one of over 1000 colours and finishes.

Structural Acoustix wooden flooring collection

The solution for laying wooden flooring directly onto joists, batten and cradle systems, where there are structural requirements. The floor includes an intermediary layer of REGUPOL within the structure of the board itself, reducing the critical path on site.

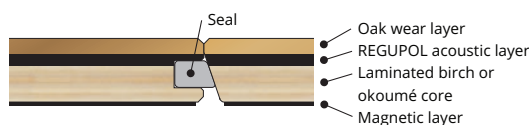

Conformity assessed UKCA and CE marked.

Available format (width x length x thickness)

REGUPOL sonus eco 3 18db dLw reduction core 140–260mm x random up to 2400mm x 25mm + custom made thickness.

Magnetic wooden flooring with REGUPOL acoustic layer

Available format (width x length x thickness)

140/160/180/220mm x random up to 2400mm x 16mm
16mm – 4mm oak wear layer, 9mm multi-layer birch or okoumé plywood and REGUPOL sonus eco 3 acoustic centre layer (18db dLw reduction)

Over 1000 bespoke finishes
