Profile collection

The bespoke solution for the manufacture of ramps, nosings and trims.

It is often the case that a beautiful floor has to meet another surface, or come to an end somewhere.

Tier profile™ is able to create any profile specification using a host of machinery that will mould wood into any shape which answers many site requirements.

High grade European oak suitable for commercial use, is finished in the UK, and can be matched to any project colour.

Whatever the profile required, Tier profile™ can finish your floor completely.

This whole product range is available using FSC®-certified or PEFC™-certified materials on request.

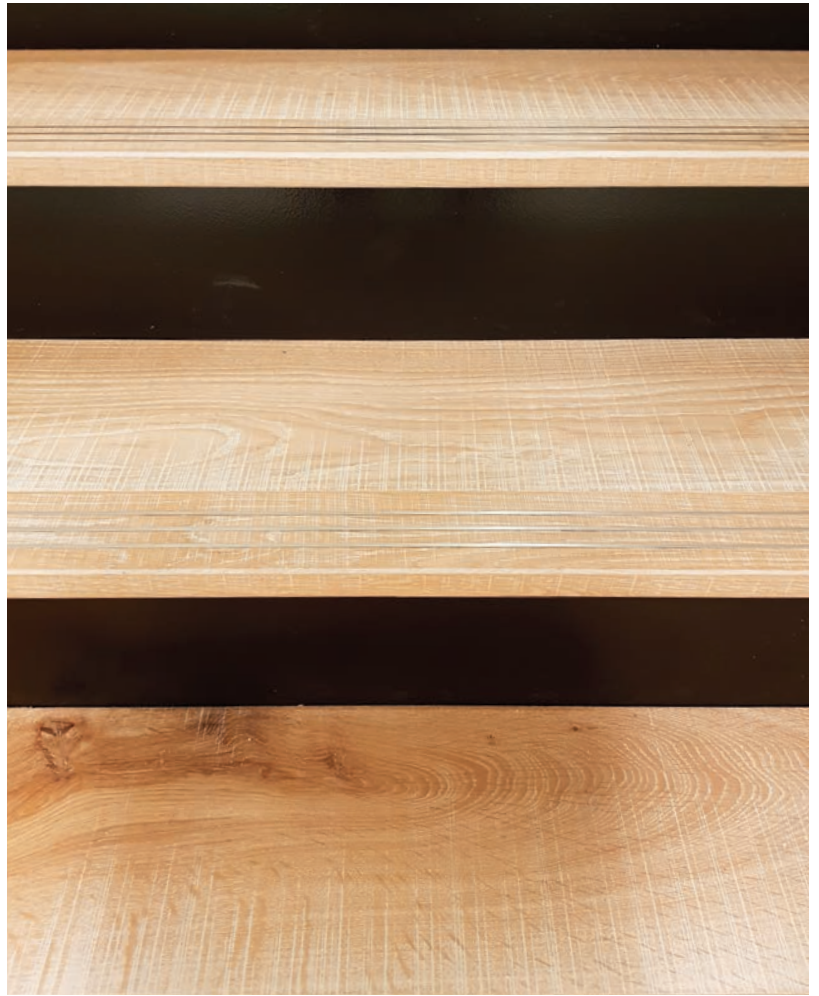

About us

With many years experience in the UK construction sector our specific expertise lies in the innovation, research, development and engineering of commercial and domestic flooring systems. Working closely with architects, designers, developers and specifiers we help fulfil any design brief by creating appropriate products and providing unique flooring solutions.
